Welcome to the Future. Here and Now... with Signia TeleCare (1 CEU)

Tish Ramirez, Au.D. & Carol A. Meyers, Au.D.

Each day you are faced with the challenge of performing the technical task of a hearing aid fitting while providing expert counseling and instructions so the patient has a successful trial period. What if you could be fully aware of how your patient is doing with their hearing instruments (in their own environments), have the possibility of remote fine-tuning, and be assured that the patient is receiving continued counseling and education? With Signia TeleCare™, our main goal is to offer an easy solution that connects the patient with their Hearing Care Professional during the trial phase. Learn about Signia TeleCare, a game changer to our industry!

Signia 2016 Product and Feature Update (1 CEU)

Catherine Jons, Au.D. & Dianna Theokas, Au.D.

Signia has expanded the product portfolio to offer inductive charging, a ready to wear IIC, and super power options for your patients. During this session you will learn about the features and technology of Cellion™ primax, Silk™ primax, Motion® P primax & Sirion™ SP BTE. A new TV transmitter and miniPocket™ will also be showcased.

To select the course you want visit: www.audiologyonline.com/signia-siemens. All recorded courses will be available on October 17th, 2016.

Tinnitus Therapy Feature Expanded (1 CEU)

Jennifer Gehlen, Au.D. & Leanne Powers, Au.D.

Signia offers an even broader portfolio of tinnitus therapy options so you can choose the approach best suited for the individual. In addition to the commonly used sound therapy approaches, we now also offer the novel, unique, and patented Notch Therapy - with clinically proven benefit. During this webinar, you will be guided through the workflow in the fully supported Connexx® Eight fitting software.

Maximize Patient Loyalty using Probe Microphone Measures with Unity 3 (2 CEU)

Navid Taghvaei, Au.D. & Amanda O'Donnell, Au.D.

Evidence supports using real ear probe microphone measures. Verification of every hearing instrument fitting can result in improved patient counseling opportunities, reduced returns for credit, and a reduced number of follow-up appointments. Unity3 is a modular system comprising of audiometer, real ear measurement, speech-mapping and hearing instrument test box components. The modular hardware and software system components will be briefly reviewed and may be selected in a package that best meets a clinic's needs.

Recorded Webinars

Quick Tips: Meet Cellion primax. "The world's first lithium-ion inductive charging hearing aid."

Lisa Klop, Au.D.

Learn about the world's first lithium-ion-powered rechargeable hearing aid with wireless inductive charging technology. This addition to the primax™ platform provides convenience and ease of use for your patients.

Quick Tips: Meet primax Motion P

Danielle Robertson, Au.D.

The Motion P BTE now joins the primax platform. Discover more about this powerful BTE as well as programming considerations within the Connexx Eight software.

Quick Tips: Meet Silk primax

Navid Taghvaei, Au.D.

Invisible, discreet, and convenient! Loaded with primax technology to meet the demands of the wearer and their listening environments. Discover how to offer this new CIC in your clinic.

Quick Tips: Meet the miniPocket

Amanda O'Donnell, Au.D. & Carol A. Meyers, Au.D.

The miniPocket provides another option to those individuals who like a self-contained remote. Learn how quick & easy it is to add this accessory to the fitting.

Quick Tips: Meet the NEW TV transmitter

Lisa Klop, Au.D.

The new TV transmitter pairs with our easyTek™ to provide convenient streaming from an outside audio source to the hearing instruments. This transmitter connects easily to TVs with Optical Output or RCA outputs. Instructions on how to set up the transmitter will be discussed.

Additional Training Options

1) Virtual Assistant: Real-time training

Our Virtual Assistant enables our Technical Support and Training Teams to help you in real-time. The Virtual Assistant allows secure access to your desktop to assist with troubleshooting technical support issues, Connexx® fittings with patients, and one-on-one trainings of our products and features.

2) In-office training

If you have a staff of audiologists who need training, the Education Team will schedule an in-office training to be sure you are comfortable with fitting *primax* hearing instruments.

Contact Customer Care (800) 766-4500 directly for these training options.
